Submitted to His Highness.

The question of selecting a suitable site for the location of an industrial suburb in the Mysore City has been under consideration for some time past A Sub Committee was appointed by the Mysore City Municipal Council to investigate the question and several alternative sites were selected for the purpose The proposals of the Sub Committee were examined by Messrs Karpur Shrinivasrao, E.A S Bell, T V Armugam Mudaliar and R E Bury and , after personal inspection, they have approved of the site near the level crossing at the junction of the Mysore-Nanjangud Railwey line and the Mysore-Manantody road (site No 2 on the plan hereto attached)

2 The President of the Municipal Council proposes that out of this land about 100 acres may be - - marked out for the Railway Workshop and other subsidiary buildings and that the remaining area be divided into plots of five acres each and set apart for factories that may be started hereafter.

3 I delayed the question for some time as I had some misgivings about the smoke nuisance that may arise by locating the factories at the site proposed As many of the factories will be worked by electric power, the smoke trouble will not be serious But if ever the factories are worked by coal, it is very likely that the smoke will be carried towards the Chamundi Hill instead of into the City Mr M Kantaraj Urs, the Member of Council on leave, has approved of this site

"Draft for approval"

4 The draft order in the file conveying general approval to the proposal of the President of the Municipal Council and issuing further necessary instructions in the matter, may be graciously approved.

3 Mr T V Arnugam Moodliar ,
Senior Surgeon and myself.

SIR,

With reference to correspondence ending with my letter No 140 dated 20th February 1915, I have the honour to report that the Municipal Council appointed a Sub-Committee consisting of Rev H Gulliford, Messrs Muhammad Jaffer Sab, Amble' Anniah Pandit, Tiruvengadam Moodliar and myself to - investigate the proposals regarding the preparation of a scheme for an industrial suburb to the City, and they, having met on the 24th February 1915, submitted a report, wherein they proposed two alternative sites, one to the north of Isolation Hospital and the other to the south of Dodda Holgere

2 The Municipal Council approved the recommendation of the Sub-Committee in their meeting held on the 25th February vide resolution No XIX, copy of which is herewith enclosed for ready reference But, as it was necessary to consult the marginally noted officers also in the matter, the resolution of the Municipal Council was communicated to them with a request to arrange for a meeting of all these officers to settle the question In accordance with this requisition, the following officers met in the Town Hall on the 16th April last and after great deliberation and personal inspection selected the site situated near the level crossing at the junction of the Mysore-Nanjangud Railway Line and the Mysore Mantody Road A copy

Memo of inspection of officers, as per Government order No. 312-3/Ml. 134-14-2 dated the 22nd August 1914, for the selection of a site for an industrial suburb and Railway Workshop on 16th April 1915

- -

The following officers met at the Town Hall on 16th April 1915 at 4 P.M -

1. Mr Karpur Shrinivasrav, Chief Engineer,
2 Mr E.A.S Bell, Railway Chief Engineer,
3 Mr Berry, Superintendent of Railway Workshops,
4 Mr T V Arumugam Mudliar, Senior Surgeon, and
5 Mr T G Lukshmana Rao, President and Chairman, Mysore City Municipality

Mr. Chatterton was absent

2 The matter was discussed generally and after studying the plans, three sites were selected They were all inspected on the spot by the members of the meeting

3 Site No 1 - This is situated near the Banni Mantap and by the side of the Railway line to Seringapatam. It was found ill-suited for the purpose, as the land is very uneven Sufficient land of fairly level plots cannot be found for the location of the Railway Workshop as about 30 acres are required for the purpose The site is also too far from the Mysore City Railway Station The only advantage this site has, is its proximity to the water supply reservoir, but such supply can be easily got from any other site in the suburb

4 Site No 2 - This is situated beyond the Isolation Hospital in Erangere Though fairly extensive, the site is sloping more than is suitable for a large and extensive Railway Workshop The sidings from the Railway line will be very long, will have to pass through thickly populated parts and will be prohibitively costly The nearness of the Isolation Hospital is also against this site

5 Site No 3 - This is situated near the
